pampering personal products are the next-best thing to spa livin'

While nothing beats a trip to a fabulous destination spa, it can set you back a pretty penny. Luckily there's a wealth of spa-inspired products that bring the pampering to you. We can't promise the deep relaxation and therapeutic benefits of a four-handed Swedish massage,

but we can guarantee you glowing skin, hair, nails and even teeth. But the spa-style ambience is up to you. Ole Henriksen, founder of the OleHenriksen Face/Body Spa in West Hollywood, CA, and an award-winning skin-care line, suggests "dimming the lights, burning an aromatherapy candle, playing

soft, new-age music and setting your thermostat to a balmy 80 degrees" to mimic the atmosphere of a treatment room. Now you're ready to don your fluffy white robe and slippers and indulge in these spa-worthy products. For maximum chillaxing, remember to switch off your phone ringers.
